ssuico78@gmail.com

CAREER OBJECTIVE

A results-driven software developer specializing in building and deploying full-stack web applications from concept to production. Experienced in developing user-centric frontend platforms and integrating them with scalable backend systems and cloud infrastructure. Proven ability to manage end-to-end delivery pipelines, including API integration, deployment, and monitoring. Adept at collaborating with cross-functional teams to translate complex technical and business requirements into reliable, client-ready solutions. Passionate about leveraging modern technologies and AI-driven workflows to deliver impactful and scalable products.

SKILLS & TECHNOLOGIES

Core Competencies	Full-Stack Development (Frontend-focused), UI/UX Design & Prototyping, API Integration & Data Pipelines, Cloud Infrastructure, Workflow Automation, CI/CD & Monitoring
Frontend Technologies	ReactJS, NextJS, Vite, Tailwind CSS, Shadcn, Zustand
Backend & Tools	Node.js, Python, FastAPI, Docker, Cursor AI, Figma, Zapier, Postman
Cloud & Data	Google Cloud Platform (GCP), Cloud Run, BigQuery, Cloud Tasks, Cloud Schedulers, Cloud Build, Vercel, Railway

PROFESSIONAL EXPERIENCE

Software Developer – Research & Development Project

Year 2 – Present

Channel Precision Inc (Internal Transfer)

- Managed and maintained Amazon API pipelines (SP-API & Ads API), ensuring reliable data ingestion and high-throughput processing.
- Built a robust cloud-based data infrastructure using FastAPI and Google Cloud Platform to support company-wide analytics.
- Developed a real-time monitoring dashboard using ReactJS, continuously deployed via Vercel for instant stakeholder visibility.
- Implemented efficient CI/CD workflows using Google Cloud Build, significantly improving deployment speed and system reliability.
- Containerized modular applications using Docker to guarantee consistent environments across local development and production.
- Owned end-to-end deployment pipelines, incorporating environment setup, precise cloud configuration, and proactive system monitoring.

Software Developer

Nov 2023 – Present

Channel Precision Inc

- Built complex internal web applications to streamline cross-department workflows, heavily improving overall operational efficiency.
- Developed automated scripts and custom internal tools to eliminate manual, repetitive tasks and consolidate multi-step processes.
- Created highly reusable modular code libraries for shared features, accelerating development turnarounds across multiple parallel projects.
- Transformed expansive raw datasets into structured, usable business assets through deep data cleaning, filtering, aggregation, and relational joins.
- Researched emerging software technologies and shared actionable insights to continuously improve core team development practices.

UI Developer Intern

Jan 2023 – Apr 2023

DNA Micro

- Completed rigorous, hands-on UI development training leveraging ReactJS, PugJS, and SASS.
- Gained practical enterprise experience with structural GitLab git workflows and component-driven architecture using Storybook.

EDUCATION

University of Southern Philippines Foundation

2021 – 2023

Bachelor of Science in Information Technology — Cebu City

STI College Cebu

2020 – 2021

Bachelor of Science in Information Technology — Cebu City

Cebu Institute of Technology University

2019 – 2020

Bachelor of Science in Information Technology — Cebu City

STI College Cebu

2017 – 2019

Tech-Voc in Information Communication Technology — Cebu City

Mandaue City Comprehensive National High School

2013 – 2017

Tech-Voc in Computer System Servicing — Mandaue City
